FAMOUS TRAIL OVER VRŠIČ

A regional asphalt-paved road leads to Vršič – the highest mountain pass of Slovenia (1,611 m). The road leads from Kranjska Gora pass Jasna Lake to Tičar Lodge atop Vršič. The high-mountain road from Kranjska Gora over Vršič to Log in Trenta has 50 switchbacks – 24 on the Kranjska Gora side and 26 on the Trenta side.

Along the route you can see the **Russian Chapel**, **The Prisank natural window** and the **Heathen Maiden**. On your way down to Trenta you can see the **monument dedicated to dr. Julius Kugy** (who discovered and explored the Julian Alps,) the **Soča River spring** in the valley of Zadnja Trenta as well as an **Alpine botanical garden "Juliana"**.

Once you reach the top you can enjoy some peace and quiet and grab a meal or something to drink at one of the lodges.

Vršič is an excellent start point to set off to **Mt. Mala Mojstrovka**, **Mt. Jalovec** and **Mt. Slemenova Špica** (particularly popular among families).

TIP

During World War I, Kranjska Gora became an important strategic point on account of the Isonzo Front that emerged between the Austria-Hungary and Italy on the Soča River. This was also the reason why Austria-Hungary had had built the road over the Vršič mountain pass. The road was built by the prisoners of war, especially Russians who were killed in the avalanche on March 8 1916. The Russian Chapel is dedicated to them.

TIP

Lake Zelenci are an emerald green lake. Its porous bottom consists of layers of marl through which numerous extremely clean and cold streams emerge that give the water its characteristic blue-green colour. It is because of this colour that the lake and the surrounding area were named Zelenci ("the green ones"). A special wooden footpath allows you to walk to the lake and explore the area.
